

PAWEŁ ŻURAWSKI

JUNIOR DATA ANALYST

ABOUT ME

Junior Data Analyst with a passion for transforming complex information into actionable insights. As a Big Data Analytics student at SGH and a graduate of Computer Science and Econometrics at SGGW, I combine a strong foundation in SQL, Excel, and Python with hands-on experience in building interactive visualizations and automating data analysis processes.

SKILLS

- **SQL** (SQL Server, PostgreSQL, SQLite)
- **Python** (Pandas, Matplotlib, Seaborn, Numpy, Tkinter, BeautifulSoup, etc.)
- **Microsoft Excel** (Pivot Tables, VLOOKUP, INDEX & MATCH, CSV Files, Power Query, Integrity with Microsoft SQL Server and Power BI)
- **Microsoft Power BI** (Dashboards, DAX)

ENGLISH - B2

POLISH - NATIVE

CERTIFICATES

- **IBM DATA SCIENCE**
- **"UMIEJĘTNOŚCI JUTRA 2.0" GOOGLE x SGH**
- **100 DAYS OF CODE**
- THE COMPLETE PYTHON COURSE
- **MICROSOFT POWER BI**
- **THE COMPLETE SQL BOOTCAMP**
- **MICROSOFT EXCEL**
FROM BEGINNER TO ADVANCED
- **EMOTIONAL INTELLIGENCE**
- GLOBAL LEADERSHIP PARTNERS

EDUCATION

SGH (Warsaw School of Economics)

Big Data Analysis - Artificial Intelligence in Business (Master Degree) 2025-2027

SGGW (Warsaw University of Life Sciences)

Computer Science and Econometrics
(Bachelor's Degree) 2022-2025

EXPERIENCE

JUNIOR DATA & AUTOMATION - ATHLON

Data Analysis & Visualization:

Executed advanced SQL queries and created reports and dashboards in Power BI and Excel to support business decisions.

Automation & Data Engineering:

Developed Python scripts to automate data processing and integration from various sources, which increased efficiency.

Predictive Modeling:

Prepared data and conducted residual value analysis of vehicles, supporting strategic and financial planning.

Operational Support:

Managed data within company systems and resolved operational issues, supporting the sales department.

IT INTERN - KARL STORZ

Process Automation:

Designed and implemented applications in Python (Pandas, Tkinter) to automate key tasks, including: rapidly locating translated components in PDF documents, automatically generating translations based on a translation database, and extracting specific pages from catalogs.

Database & Document Management:

Created, organized, and managed a database of medical translations and a document archive for tender offers.

Data Analysis:

Conducted basic sales data analysis using pivot tables to support business operations.
